## Un Secolo di storia e un futuro da illuminare One century of history and a future to illuminate

La nostra storia comincia dal momento in cui l'arte del vetro entra nella nostra famiglia. Siamo agli inizi del 900' e Antonio Tammaro diventa un affermato Mastro vetrario a Napoli, creando , quelle che all'epoca, erano considerate opere d'arte.

*Our story began when the art of glass entered our family. We were at the beginning of the 1900s and Antonio Tammaro became an established master glassmaker in Naples, creating what at the time were considered works of art.*

Come tradizione insegna, l'arte passa di padre in figlio. Carmine, seguendo le orme del padre, continua con l'arte del vetro cristallo per tavolame, ma l'avvento dell'industrializzazione lo costringe a un cambio di rotta: lavorazione di vetro soffiato per illuminazione. Fonda così ,alla fine degli anni 50', la VE.CRI.N.

*As tradition teaches, art skill passes from father to son. Carmine, following in his father's footsteps, continued with the art of crystal glass for tableware, but the advent of industrialization forces him to change course: starting the processing of blown glass for lighting. Thus, at the end of the 1950s, VE.CRI.N. was founded*

Negli anni 80' nasce la vetreria Tammaro e figli. Il salto generazionale porta parte del processo produttivo alla meccanizzazione che, affiancata alla classica lavorazione del vetro, permette all'azienda di adeguare la produzione alla richiesta in tempi brevissimi (a differenza delle aziende completamente meccanizzate obbligate a produzione di massa dello stesso articolo). Questa flessibilità permette di raggiungere clientele diversificate.

*In the 80s "Vetreria Tammaro e Figli" glass factory was born. The generational leap brought part of the production process to mechanization, which, alongside the classic glass processing, allowed the company to adapt the production to the market demand in a very short time (unlike fully mechanized companies obliged to mass production of the same article). This flexibility of production did allow us to reach diversified customers.*

Lo spettro della globalizzazione e il fulmineo sviluppo dei paesi extra europei instillano nella mente del giovane Franco , figlio di Carmine, l'idea di lanciare sul mercato il prodotto d'illuminazione assemblato. Nasce ,così, negli anni 90' la F.A.N. Europe lighting che , in breve tempo s'impone sul mercato proponendo articoli nei quali il vetro rimanga elemento primario.

*The threat of globalization and the rapid development of extra-European countries instilled in the mind of young Franco, Carmine's son, the idea of launching the assembled lighting product on the market. Thus F.A.N. Europe Lighting was born in the 90s. In a short time, this new company imposed itself on the market by offering assembled light items in which glass remains a primary element.*

Alla fine degli anni 90' , per mantenere alto il target di qualità e al contempo diversificare sempre di più la gamma dei prodotti, Franco fonda la L.V.F. , azienda che produce parti metalliche per illuminazione: alla lavorazione del vetro soffiato e centrifugato si aggiunge, con la nascita dell'azienda 2T, quella del vetro a lastra. La F.A.N. Mantiene il ruolo di assemblaggio, controllo qualità e lancio sul mercato del prodotto finito.

*At the end of the 90s, to keep the quality target high and at the same time to diversify the range of products more and more, Franco founded L.V.F. , a company that manufactured metal parts for lighting. With the creation of the company 2T, production of bent glass was added to the processing of blown and centrifuged glass. In this way F.A.N. Maintained the role of assembly, quality control and launch of the finished product on the market.*

Nel 2010 , periodo di crisi economica europea, i costi ormai diventati insostenibili per la gestione della produzione del vetro, unitamente a un carenza di materia prima nel paese e a un non ben delineato settore di ricerca e sviluppo delle tecnologie emergenti nel campo dell'illuminazione (LED), costringono Franco a spegnere definitivamente i forni.

Comincia così la collaborazione con aziende extraeuropee che possano realizzare sia prodotti altamente tecnologici che dal design ricercato, rispettando costantemente le linee guida e gli standard richiesti da Franco e i requisiti delle normative europee. La F.A.N. Europe lighting lancia sul mercato i marchi IN.TEC. E Luce Ambiente e Design che racchiudono le esigenze tecnologiche e stilistiche per qualunque ambiente.

*On 2010, a period of European economic crisis, production costs became unsustainable for the management of glass production. Furthermore, the shortage of raw materials in our country and a poorly defined sector of research and poor development of emerging technologies in the field of lighting ( LED ), did force Franco to permanently switch off the ovens. Thus cooperation with non-European companies did begin and did start the possibility to create both highly technological products and refined designed products, constantly respecting the guidelines and standards required by Franco and the requirements of European norms and regulations. F.A.N. Europe Lighting launched the brands IN.TEC and Luce Ambiente Design on the market that both encompass the technological and stylistic needs for any light environment.*

Oggi la FAN Europe lighting si affaccia al futuro: i fratelli Tammaro Letizia, Carmine e Davide si affiancano al padre per gestire rispettivamente amministrazione e rapporti con l'estero, ricerca - sviluppo e logistica , area commerciale e assistenza con un team affidato di 40 persone. Alla storica sede di Nola con i suoi 15000 metri quadrati coperti su 30000 totali si aggiungerà la nuova sede a Milano studiata per ampliare i rapporti con l'Europa, migliorare ulteriormente la logistica ma soprattutto per un controllo qualità sempre più minuzioso e attento.

*Today FAN Europe lighting faces the future: the brothers Tammaro Letizia, Carmine and Davide work alongside their father to manage the administration and foreign relations, research - development and logistics, commercial area and assistance with a close-knit team of 40 people . The new headquarters in Milan, designed to expand relations with Europe, will be added to the historic site in Nola with its 15,000 square meters out of 30,000 in total, improving logistics but above all for increasingly meticulous and careful quality control.*

Nasce l'app intec, la luce diventa smart con prodotti app e voice control. Nuovi servizi di customizzazione e domotica per adattare in maniera funzionale i prodotti professionali. Luci industriali ad alti lumen e consumi green. Cataloghi in continua evoluzione per tenersi al passo con la tecnologia che avanza e nuovi design.

*The Intec app is born, the light becomes smart with app products and voice control. New personalization and home automation services for the functional adaptation of professional products. High lumen industrial lights and green consumption. Constantly evolving catalogues to keep up with advancing technology and new designs.*

La tradizione continua, diventa innovativa; un nuovo concetto di luce fatto su misura per tutti gli ambienti e gli stili.

**Good Light & Good Style!**

*The tradition continues, it becomes innovative; a new concept of light tailored to all environments and styles.*
